Program Results

- 94% resolved within EAP
- 18% utilization

How We Do It

Ulliance offers the Resolution EAP Model® as this model focuses on helping clients resolve and manage their work/life issues within the EAP. Our trademarked Resolution EAP Model® with a flexible number of visits results in over 94% of clients' issues being resolved or managed within our EAP.

There are both personal and financial benefits that our unique Resolution EAP Model® brings to companies and their employees. Traditional EAP methods provide an assessment and then refer the majority of their clients directly to outside treatment providers. This scenario leads to increased expenses to the company insurance benefits and employee out-of-pocket expenses. The result is high company and employee healthcare costs and lower utilization of the EAP service.

"I would like to give Ulliance Life Advisor EAP my highest recommendation for any organization who cares about their employees and wants them to be supported with an array of programs and excellent customer service."
